

# TEAM1500 Support Form

The TEAM1500 Fund has been created to ensure continued access to safe and effective sedation dentistry for the American public.

The ADA's new proposals ignore the millions of patients who have already safely and successfully been treated using oral sedation dentistry. **Whereas there is no known evidence that oral sedation dentistry as practiced according to existing ADA guidelines has ever resulted in an injury or fatality to a patient, there is overwhelming evidence of the price paid by patients who avoid the dentist for five, ten, even twenty years out of fear and anxiety.**

You need not be a member of DOCS nor even currently practicing oral sedation dentistry. You need only have a true commitment to the public's health and providing equal access to quality care for all patients to express your opposition.
